

Calling attention motion by Shri Kedar J. Naik, Hon' ble MLA.

The text of calling Attention motion is as follows.

Fear and anxiety in the minds of the people of Ramnagar area, village Betim in Reis Magos. The water is contaminated and live microorganisms can be seen in the water which happens many times every year as the PWD pipe lines are layed in the road side drains which is the main cause of contaminated water. Every year there is breakout of typhoid, malaria and dengue in this area. Steps the Government intends to undertake to replace the said pipeline so that Ramnagar and people of surrounding area will get clean potable drinking water.

Ramnagar area, a ward in Reis Magas village Panchayat is supplied water from 650m³ OHR at Alto Betim, the source of which is from Assonora Water Treatment Plant which treats the water to meet the parameters for quality of drinking water and the same is monitored 24 X 7.

The said area was scouted on 18/07/2022 and on local enquiry no complaints were received from consumers of contamination in piped supply. However as precautionary measures P.W.D has begun collection of water samples for testing the same at PHE Lab.

Beside this PWD has deployed its personnel to detect any leakages in distribution system and also in service connection pipelines.

It is also seen that drains are constructed in some areas over the distribution/branch lines. Estimates are being prepared for shifting the same on a safe alignment.

Department is taking utmost care to supply pure drinking water and there should not be any Fear & Anxiety in the minds of the people of Ramnagar area, village Betim in Reis Magos.
